

Project Demo Planning

Date	14 July 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the problem faced by farmers, and state the project objectives.	2	Abhirama Rao Konagalla
2	Solution Overview	Explain the OptiCrop architecture, technologies used, machine learning workflow, and system features.	3	Aishwarya Vacha
3	Live Application Demonstration	Demonstrate the web application by entering soil and environmental parameters and showing the crop recommendation.	2	Revanth Kumar Katakam
4	Machine Learning Model	Briefly explain dataset preprocessing, model training, model selection, and the use of the .pkl file in Flask.	2	Chilakala Manikanta Sai Anurudh
5	Project Outcomes & Future Enhancements	Present project benefits, results, and proposed future enhancements such as weather forecasting and fertilizer recommendations.	1	Suryadevara Mohana Lakshmi
6	Question & Answer Session	Answer questions from the evaluation panel and provide additional clarifications.	1	Aishwarya Vacha

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the agricultural problem and why OptiCrop was developed.
2	Solution Overview	Present the system architecture, technology stack, and workflow.
3	Live Feature Demonstration	Show the application by entering sample values and displaying the predicted crop.
4	Q&A Session	Address questions from the evaluators.
